### **DETAILED ACTION**

Upon further consideration, the following restriction requirement is deemed necessary.

This restriction removes the cancelled claims 6-10 and 13 from the restriction requirement. Any delay in examination is inadvertent.

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, drawn to an apparatus, classified in class 29, subclass 33M.

II. Claims 11-12, drawn to a method, classified in class 29, subclass 884.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and of Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus, such as one that positions the different types of crimping blades along a line so that there is no need for rotating the blades.

3. Due to the complex nature of the election of species requirement, no telephone call was made to the attorney of record to request an oral election to the above requirement.

#### ***Conclusion***

4. Please provide reference numerals to all the claimed limitations (*a pair of connector tables, locking means, moving means, a pair of connector holding poles, a cylinder, an engagement hole, a rotor, means of rotating the rotor, a slider, a cam body, a rotating plate, a*
